The Life jacket-Adapted Lj-A is designed for disabled people. It ensures a great degree of stability. The body leans neither to the back or to the side and, even more important, the face always remains out of the water.

Lj-A's gives the freedom to acquire autonomy.

Lj-A	XX-Large		135 to 250 lb	62 to 115 kg

PFD-A's and Lj-A's The unique therapy tools

Designed from very high standards established by hospitals, PFD-A's and Lj-A's were first developed in rehabilitation centres to meet the needs of people having lost a certain degree of mobility and disability.

PFD-A's and Lj-A's meet the needs of a large clientele such as hydrotherapists, sports leisure, children and senior citizens. They have now become a reference in water safety in North America Rehabilitation Centers.

PFD-A and Lj-A resist involuntary reflexes and uncontrollable movements. PFD-A's and Lj-A's unique design stabilizes the body on the water. SiteWeb: see videos: <http://www.pfd-a.com/VideoDemo.html>

They are great tools for therapy and rehabilitation. Specialized educators have, for the first time, a steady and safe support to dispense their care. Therapists can now extend their hydrotherapeutic care simultaneously to a greater number of individuals.

Treatments gain in quality.

The Personal Floatation Device-Adapted PFD-A's maintain the body stretched out in a dorsal position. They ensure greater stability in cases of morphological dysfunctions, involuntary sudden reflexes.

They greatly increase users' confidence.

PFD-A Horizontal

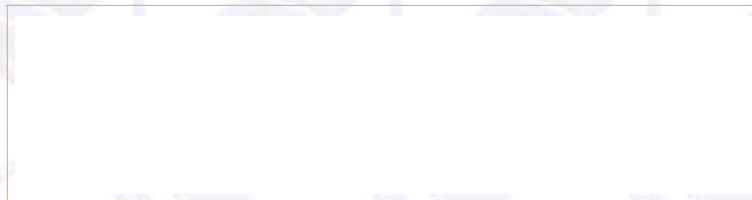

The PFD-A's flexibility and ergonomic design increases the overall comfort and stability on water.

Available in sizes : for physically challenged people

PFD-C	XX-Small	Infant	14 à 30 lb	6 à 16 kg
PFD-A	Small	child	30 à 40 lb	16 à 20 kg
PFD-A	Narrow	slender people	40 à 90 lb	18 à 40 kg
PFD-A	Medium	adult less 145cm	40 à 90 lb	18 à 40 kg
PFD-A	Large	adult	90 à 190 lb	40 à 86 kg

The right choice of Vest

This device is not a life jacket. Always use within reach of safety. CE standard is available.
Is the future user able to place him/herself upright in water **without help**? If so, you should use one of the "Lj" models.

“... All my kids had a wonderful time being independent in the water. Thank you for all your creativity and help. I've been doing this type of work for 20 years and knew someone could come up with a lifejacket to work for special populations. I am really thankful that I found your WebSite.

Patricia M., Aquatic Coordinator, Barber National Institute, Erie, PA, US

PFD-A vest is designed for people with multiple handicaps. It maintains the body in a horizontal position on the back and ensures stability.

Ideal assistances for the hydro therapy. CE approved on request only.

Lj-A vests maintains the user in an upright position designed for people with reduced mobility.

Ideal to keep the face out of the water.

Winner of 5 prizes, including 4 internationals
